

Kevin Durocher  
Board Qualifications & Experience

It has been an honor to serve the past three years on the Board of Directors for Montana Rural Water Systems. It is my aspiration to continue serving for a second term to help further accomplish the objectives that MRWS needs to remain viable into the long term future. I have a Bachelor of Science Degree in Water Quality and a Broadfield Science Teaching Degree. My experience in the water industry includes eight years as an operator for the Great Falls Water Treatment Plant, a 40 MGD surface water treatment plant; eight plus years as the Training Specialist for MRWS, providing training and technical assistance to the operators of Montana; and four years' experience as the owner/operator of Water-Tech Solutions LLC, a contract operating service for five small water systems in the Great Falls area. Additionally, I have worked as a high school science teacher. I also bring business experience to the table as an owner of my contract operator business mentioned above, and as the owner/operator of Cierra Motors LLC, a used car dealership that I run with my wife, Patricia. As a former employee of MRWS, I probably have a better understanding of the job positions and the programs that fund these positions than most individuals seeking a position on the board. I think this a great asset when it comes to lobbying and explaining to those controlling the funding why MRWS is so important to the water and wastewater systems of Montana. I am asking for your support as I run for a second term on the MRWS Board of Directors.

Sincerely,

Kevin Durocher
