

This Training Session:

This session is designed for small systems. The focus of the training will be on bacti & chemical sampling for small systems, with an emphasis on the Revised Total Coliform Rule. The second major focus of this training is monitoring schedules. We will be covering the "Drinking Water Watch" website and online Monitoring Schedules where operators can retrieve information on their system. Public Health & Drinking Water will be covered, with focus on areas such as private & public well problems and nitrates. We will also cover some examples of things observed during sanitary surveys (if time allows).

This training session is designed for "Awareness Training" and is not intended to be your only source for information!

***** IMPORTANT *****

Pre-Registration

Please pre-register by sending an e-mail with your name and the system you operate to the MRWS Office at:

mrws@bresnan.net

We need a headcount for refreshments and handouts, and also we try to tailor instruction to some degree to the operators/systems in attendance.
