George Whittaker
District Manager of
Core & Main

Core & Main is sponsoring the lunch for
this Training Session.

ABOUT OUR SPEAKERS:

George Lacefield served over 23 years in the US Navy as a Boiler Technician (Water Tender), and Gas Turbine Technician as well as a Basic Training Instructor and a Trainer of Basic Training Instructors. While in the US Navy, he earned his certification as a Master Training Specialist. Following his Naval service, George worked as a Field Service Engineer, providing consulting and trouble shooting on various systems at numerous power plants throughout the country. George began his career with Mueller in May 2010 as an Assistant Training Manager & was promoted to Training Manager March 2011 and Sr. Training Manager Feb 2018.

Jim Humphries served over 22 years in the US Coast Guard as a Shipboard Engineer (Mechanic), Radio Operator, and Information Technology Specialist. He learned by conducting repairs and preventive maintenance on valves, fittings, pumps, reverse osmosis units, boilers, diesel engines and other associated equipment. After various assignments, Jim became the Command Master Chief of Base Honolulu in Hawaii, where he served as the senior enlisted advisor for over 350 enlisted Coast Guard personnel. Jim began his career with Mueller in April of 2016 as an Assistant Training Manager. Jim holds a BS in Liberal Studies from Excelsior College and a Masters of Business Administration degree in Homeland Security from Northcentral University.

PRE-REGISTRATION

Please E-mail the MRWS Office or call to Pre-Register for this training. We need a head count so Core & Main can order the meals.

Training Agenda

8:00am - 8:15am Registration/Sign-in

8:15am - 9:45am—We will discuss Hydrant Security Devices which prevent tampering with hydrants and their applications. We will also cover the safe operation, maintenance, and troubleshooting of fire hydrants.

9:45am – 10:00am Morning Break

10:00am—11:45am—We will discuss gate valves, focusing on how they operate and the importance of the preventative maintenance of each to ensure proper working condition. We will look at brass products and their uses in the field, starting with corporation stops, curb stops, service fittings, meter valves, meter boxes, yokes and settings.

>>>>>11:45am-12:45pm Lunch Provided by Core & Main<<<<<

12:45pm – 2:00pm - We will pick up with butterfly valves and check valves and move into pipe repair couplings and their versatility, features and functions. We will discuss leak detection and pressure monitoring of the water distribution systems as well as automated flushing systems.

2:00pm – 2:15pm Afternoon break

2:00 - Take apart a 6” Hydraulic Control Valve—Hands on

2:15pm- 3:00pm—We will conclude the day discussing the safe installation of service saddles, tapping sleeves and stainless steel repair clamps. We will identify the proper selection of these products and how they will work for you. We will conclude with drilling and tapping machines and selection of the right machine for you.

3:00 - Wrap up and collection of forms

Thank you for joining us!
