About This Training

Although the agenda for this conference was designed to fit the needs of the National Park Service and their operators, it is open to all operators from any system! There is a broad range of topics covered that would be helpful to new and seasoned operators alike. Operators & Utility workers dealing with surface water, well water, wastewater & distribution should all find this workshop helpful. CEC's are shown for each block of instruction according to Montana Certification Standards. Operators from other states should consult their certifying agency and bring the appropriate forms necessary. It may also be helpful to bring the contact information for the person in charge of CEC's or CEU's from your state, should any questions arise!

IMPORTANT: Some states require pre-approval for training. Consult with your states
