We will be applying for continuing education credits for CO, MT, ND, SD, UT, and WY drinking water and wastewater operators.

The U.S. Environmental Protection Agency (EPA) and the Colorado Water and Wastewater Agency Response Network (CoWARN) will conduct a virtual Region 8 Water, Energy, and Emergency Management Workshop. The workshop will focus on power outages and how they affect both water and electric utilities as well as the role of emergency management agencies during a power outage. The target audience is drinking water, wastewater and electric utilities and local and state emergency management staff. The workshop will include presentations to foster ideas about how to better prepare for, respond to, and recover from power outages. The workshop will also feature a tabletop exercise designed to start discussions on what happens when a power outage lasts longer than expected.

Please register for this free workshop at:
