Have a safe trip home!

Montana Rural Water Systems, Inc.

People Committed to Helping Small Water & Wastewater Systems!

Who We Are:

Montana Rural Water Systems, Inc. is a non-profit association of Rural Water Districts, Homeowner's Associations, Cities & Towns, Mobile Home Parks, Schools, and Campgrounds throughout the state.

What We Do:

We offer training and technical assistance to small Water & Wastewater systems throughout our state. We have a Training Specialist who sets up training workshops and provides technical assistance. The Water Circuit Riders, along with the Wastewater Technician, travel around the state providing information and technical assistance to those responsible for proper maintenance and operation of their systems. The Source Water Specialist provides help and assistance in developing "Source Water Protection Plans" for communities.

Our workshops are set up based on the needs of the systems and include training on various system maintenance, operational procedures, and rules & regulations to help systems to maintain compliance.
