## Operations Technician

**Company Overview:** Peak Water Services (PWS) is a leading service provider specializing in the maintenance, repair, and optimization of rotating equipment and associated systems in various industries, including water, wastewater, manufacturing, oil and gas, power generation, and petrochemicals. We are dedicated to providing high-quality services to our clients, ensuring the efficient and reliable operation of their critical machinery and systems.

**Job Summary:** As an Operations Technician, you will play a pivotal role in assisting field efforts while specializing in Wastewater and/or Potable Water System operations to accommodate customer's needs and assisting Peak Water employees by helping with system operations and repairs, troubleshooting issues, evaluating and understanding their needs, and formulating a plan to ensure they are met.

### Essential Duties and Responsibilities:

- **System Operations:** Independently review permits to fully understand regulatory requirements for sampling, reporting, renewals, etc. while maintaining and executing a schedule for system operations such as independently collecting samples and completing monitoring reports.
- **Regulatory Requirements:** Submit necessary reports to the state's governing agency of Water and Wastewater. Communicate with regulators, owners, engineers, and others using clear, precise writing and discussions
- **Repair and Maintenance:** Assist Lead Technicians in performing repairs, overhauls, and maintenance tasks on various types of equipment and associated components.
- **Company Equipment:** Maintain company equipment in proper operating condition by following operating instructions; maintaining supplies; and performing preventive maintenance. Maintain shop and trucks in an organized, clean, professional fashion
- **Safety Compliance:** Adhere to all safety regulations and protocols while working on rotating equipment, wastewater treatment and water systems, and all of the associated equipment, ensuring a safe working environment for yourself and others. Ensure all safety procedures are followed on every job site, every day.

Bozeman, MT - Williston, ND - Layton, UT - Blackfoot, ID - Billings, MT  
(406) 813-7035 - [www.peakwaterservices.com](http://www.peakwaterservices.com)

- Teamwork: Support Lead Service Techs and other operators in ensuring all documentation is completed, collected, and submitted to appropriate parties in a timely fashion on systems that you are not assigned to directly.
- Quality Assurance: Ensure that all repairs and maintenance tasks meet industry standards and specifications, striving for excellence in every aspect of the job.
- Collaboration: Collaborate with other technicians, engineers, and team members to exchange knowledge, best practices, and insights to improve overall team performance.
- Customer Relations: Communicate effectively with clients, addressing their concerns, providing status updates on repairs, and offering recommendations for equipment and system optimization and efficiency.
- Continuous Improvement: Stay updated with the latest industry trends, advancements, and technologies related to rotating equipment and system maintenance, actively seeking opportunities to enhance your skills and knowledge. Your ability and willingness to learn is essential for this position.

### **Qualifications:**

- High school diploma or equivalent required.
- Must be able to use general business software (Microsoft Office, Google Docs, Excel, Adobe Acrobat) and hardware (smartphone/tablet, notebook computer, scanner, etc.).
- Small to Medium water and sewer utility systems knowledge, troubleshooting ability, and equipment maintenance experience **required**.
- Required to have a Wastewater C-1 (preferred), or a Potable Water System 4AB license
- Ability to obtain and maintain a DOT medical card and unrestricted driver's license w/ acceptable MVR **is required**.

Join our team as an Operations Technician, and utilize your expertise to ensure the reliability and efficiency of critical infrastructure and the interconnected systems that rely on their seamless operation. Apply now to become part of a dynamic organization committed to excellence in municipal and industrial services.

### **Work Environment:**

- Outside and exposed to the elements 80+% of the time.
- Wet and/or dusty environments.
- Potable Water and Wastewater treatment plants

- Long drive times in all types of weather, with the potential for multiple-day trips and extended standby time.

**Work Schedule and Benefits:**

- The position will be based out of Bozeman/Belgrade, MT.
- This is a full-time hourly wage position. Regular performance reviews will be provided and strong performance will result in pay increases.
- Schedule details to be determined and subject to periodic changes.
- Paid holidays, vacation and personal time, matching 401(k), health insurance.

Job Type: Full-time

**Benefits:**

- 401(k)
- Dental Insurance
- Vision Insurance
- Health Insurance
- Paid Time Off
- Tuition Reimbursement

**Schedule:**

- 10-hour shift

Work Location: Based out of the Billings location, but you will be working from a truck on the road. This position requires travel approximately 10% of the time to support projects outside of the local Belgrade area and to support our other regions.
