

*41st Annual Conference – 2020 Vision:  
Remember the Past. Experience the Present. Focus on the Future.*  
**Clerk Achievement Award Nominees**

**Jodie Campbell, Town of Cascade**

**Jodie Campbell** is not only the Town Clerk for Cascade; she also holds both a Water Operator and Swimming Pool Operator Certification and assists with those job duties throughout the year. Joining the Town 10 years ago, Jodie has continued to tackle many projects for the Town through researching and writing grants to fund potential projects and maintaining a good communication with project engineers and various state funding agencies. Jodie has served as Secretary for the Montana Clerk's Association and currently heads up the committee that raises funds for the association. Jodie has an outgoing personality and is always willing to take time to help other clerks across the state sharing documents and other information to assist them. Her dedicated service to her community continues to provide a great future for the Town of Cascade.

**Tammy Comer, Town of Fairfield**

**Tammy Comer** began working as Clerk for the Town of Fairfield 3 years ago. Her determined work with compiling system records, reports and maintaining good communication with state funding agencies, contract engineers and MT DEQ have all been an integral part of bringing the Town of Fairfield back into compliance for the system's utilities over the past years. Tammy's warm greeting to the public when they come to the office enhances the relationship between her office and the town. She works well with the system's staff as well as the Town Council, making life easier for all of them. Tammy's dedicated effort completes a team that is working to make the Town of Fairfield a better place.

**Beth Dotson, Lakeside County Water and Sewer District**

**Beth Dotson** started with the Lakeside County Water and Sewer District 8 years ago with no experience in the industry. It did not take her long to learn the system's existing billing and utility programs, and just 2 years later, Beth seamlessly implemented the new Black Mountain financial software for the District. Staffing the "front desk" for a community, comes with the task of providing the "first impression" of a system. Beth is always ready to answer questions and provide assistance to anyone walking through the door. Her friendly disposition to the public has even those she takes money from liking her! As an additional service for customers, the District provides a GIS Mapping computer at the front desk to assist them to determine services near their property. Beth worked with the public works staff to learn this Mapping program and now provides most of the assistance for customers improving the District's timely outreach information. Her coordinated effort with public works staff and the District Board has provided a great working environment which in turn has helped make Lakeside a great community to live in.
